Art Unit: 3617

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5, 9, 12-15 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burg (5415120) in view of Oler. Burg discloses the basic claimed structure including a lifting body ship 37 with a pressurized gas layer (note the Abstract, for example), and struts 95, 96 (note Figure 9, for example), with blowers 66,68 in the struts. Not disclosed by Burg is a curvilinear shape pressurized layer. Oler teaches a curvilinear shaped pressurized lifting layer 6. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the lifting layer of Burg to be curvilinear in shape as taught by Oler for low profile and improved steering.

3. Claims 6-8, 10, 11, 16-18, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 22-28 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wipper shows a hull. Burg 5860380 show as hull with struts.
